

Industrial power supply for a DIN rail, 24VDC 3.2A 77W, metal housing

Marka: **Orno** | Symbol: **OR-PSU-1656** | Ean: **5908254824807**

PRODUCT DESCRIPTION

An industrial power supply unit suitable for mounting on a DIN TS-35/7.5 or 15 rail. The product is housed in a metal enclosure that provides resistance to low and high temperatures. The device is suitable for use in harsh industrial environments. It is primarily used to supply power to industrial automation, machine control and is responsible for the failure-free operation of industrial systems. It is characterised by class III voltage protection and additional current and short-circuit protection. Openings in the power supply housing allow air to flow freely, so that the device is constantly cooled. This is particularly important for continuous operation of

the device and significantly increases its service life.

TECHNICAL DATA

General information:

Rated power:	77 W
Output voltage:	DC 24 V
Input voltage:	100-240 V AC
Degree of protection (IP):	20
Output current:	3.2 A
Installation:	α DIN rail
Dimensions - depth:	103 mm
Dimensions - width:	32 mm
Dimensions - height:	125 mm
