PRODUCT DESCRIPTION

NEFRYT LED garden luminaire is characterized by high quality and durability. The lamp shines with a power of 10W and emits a luminous flux of 800lm. The light temperature is 4000 K. This white light is more and more often used in modern arrangements, where minimalism and simplicity are the priority. Light in this color is a compromise between warm light and blue, cold lighting. Placed on the facades of buildings or concrete fences in gardens, the lamp will create a unique lighting scenery. An interesting visual effect is also created after combining several identical luminaires. The modern SMD LEDs used guarantee high energy efficiency

and long life of the device. The IP54 degree of protection proves the lamp's resistance to dust, dirt and water splashing from any direction. Color: white.

TECHNICAL DATA

General information:

Place of application:	Inside and out
Possibility of cooperation with a dimmer:	No
Durability L70/B50:	50000 h
Connection type:	Screw cube
The minimum distance from the illuminated object:	0,5 m
Luminous flux:	800 lm
Rated power:	10 W
Light source:	LED SMD
Degree of protection (IP):	54
Colour temperature:	4000
Beam angle:	120 °
Nominal voltage:	230V~, 50Hz
Colour:	white
Solar panel:	No
Dimensions - depth:	44.5 mm
Dimensions - width:	212.2 mm
Dimensions - height:	119.2 mm
Colour rendering index CRI:	85
Material housing:	PA6
Material of the lampshade:	PMMA
Number of on / off cycles:	100000
Protection class against electric shock:	II
Operating temperature:	- 20 ~ 40°C

Adjustment of motion detection range (SENS):

No
