PRODUCT DESCRIPTION

This modern, energy-saving HORIN highbay uses LED technology, which significantly reduces operating costs. Thanks to the high luminous flux, the luminaire perfectly illuminates high industrial rooms and warehouses with difficult conditions. The luminaires use SMD LEDs, which guarantee high energy efficiency and have a long service life, because they work up to 35,000 hours. The presented workshop lamp works with rated power of 60W and emits light with luminous flux of 5400 lm. It shines with a natural white color at a temperature of 4000K. IP65 ingress protection rating guarantees excellent protection against dust and water, therefore this

highbay lamp will easily withstand any weather outside and harsh working conditions in workshops and factories. The product is also characterized by a very high degree of mechanical strength - IK08. The luminaire is made of aluminum in black color.

TECHNICAL DATA

General information:

Luminous flux:	5400 lm
Rated power:	60 W
Light source:	LED SMD
Degree of protection (IP):	65
Colour temperature:	4000
Colour:	black
Dimensions - depth:	132.5 mm
Dimensions - width:	240 mm
Dimensions - height:	72.5 mm
Colour rendering index CRI:	80
Material:	Aluminium/Glass
