

Box for electric strike H350 long up to 40x40, anthracite

Marka: **Virone** | Symbol: **KE-2/G** | Ean: **5908254807695**

PRODUCT DESCRIPTION

Electric door-strike box made of galvanized, powder-coated profile (40x40mm). It is used both, as an outer case of the door-strike and as a door silencer. Suitable for mounting on brick posts, e.g. built of clinker bricks and on metal posts. Thanks to its dual construction it can be mounted both on right and left-handed gates. There are holes in the back panel of the housing that are prepared for electric door-strike wiring and mounting screws. The holes on the top and bottom parts of the housing are covered with plastic plugs.
