

Key safe with code lock and deadbolt

Marka: **Virone** | Symbol: **KL-4** | Ean: **5908254845215**

PRODUCT DESCRIPTION

The key safe with a code lock is a solution that ensures not only functionality but also secure storage of valuables.

The safe is made of high-quality aluminium in black-grey colour, which ensures not only aesthetic look but also durability. The solid code lock consists of 4 digits, thus enabling to set up as many as 10 000 various combinations, which is extremely secure and easy in operation. The code lock is made of metal that ensures

durability and long-term use.

The equipment has a code lock cover, which protects it from accidental water splashing and from getting dirty.

The compact dimensions allow the safe to easily fit on a shelf or in a cabinet in order to discreetly keep the keys. An additional function useful while renting a flat is the possibility of hanging it on a door or a door frame to provide the keys to the guests.

Thanks to the outer dimensions measuring 115x95x40 mm, the safe does not occupy additional space. The inside of the safe has capacity of 0,18 l and dimensions of 70x90x30 mm.

TECHNICAL DATA

General information:

Fire resistant:	nie
With electronic lock:	nie
With key lock:	nie
With combination lock:	tak
Outside width [mm]:	115
