Bathroom fan 100mm Premium, with timer and humidity sensor (ball bearing)

Useful bathroom fan that automatically draws the moist air to the outside. It is designed for surface mounting on a wall, and thanks to the use of ball bearings, it is also suitable for mounting in the ceiling. A very quiet device that will take care of the air quality in the bathroom, but will not disturb our relaxation zone. The fan has a compact design 120x120mm and a short exhaust pipe (100mm), which will fit even in shallow ventilation ducts. The device is operated by a timer and humidity sensor that turns off the fan when the humidity drops below the set level. A special decorative panel can be selected for the fan, which is available in many colors. Thanks to this solution, the device looks good not only in the bathroom, but also in other rooms. The materials used guarantee high durability of the device.

Colour:
white

Material:
ABS

Nominal voltage:
230V~, 50Hz

Rated power:
8W

General information

Colour: white

Material: ABS

Dimensions - depth: 89 mm

Dimensions - height: 120 mm

Control: humidity sensor and timer

Static pressure: 30 Pa

Sound pressure: 26 dB

Rotation speed: 2400 rpm

Air flow: 93 m³/h

Nominal voltage: 230V~, 50Hz

Type of assembly: wall or ceiling

Bearing: ball bearing

Diameter: 100 mm

Rated power: 8 W

Installation depth: 69 mm
