

Bathroom fan 100mm Premium, with timer and humidity sensor (ball bearing)

ORNO

Marka: Orno | Symbol: OR-WL-3201/100/HS | Ean: 5908254817830

PRODUCT DESCRIPTION

Useful bathroom fan that automatically draws the moist air to the outside. It is designed for surface mounting on a wall, and thanks to the use of ball bearings, it is also suitable for mounting in the ceiling. A very quiet device that will take care of the air quality in the bathroom, but will not disturb our relaxation zone. The fan has a compact design 120x120mm and a short exhaust pipe (100mm), which will fit even in shallow ventilation ducts. The device is operated by a timer and humidity sensor that turns off the fan when the humidity drops below the set level. A special decorative panel can be selected for the fan, which is available in many colors.

Thanks to this solution, the device looks good not only in the bathroom, but also in other rooms. The materials used guarantee high durability of the device.

TECHNICAL DATA

General information:

Static pressure:	30 Pa
Sound pressure:	26 dB
Rotation speed:	2400 rpm
Control:	humidity sensor and timer
Air flow:	93 m ³ /h
Type of assembly:	wall or ceiling
Rated power:	8 W
Nominal voltage:	230V~, 50Hz
Material:	ABS
Installation depth:	69 mm
Dimensions - width:	120 mm
Dimensions - depth:	89 mm
Dimensions - height:	120 mm
Diameter:	100 mm
Colour:	white
Bearing:	ball bearing
