Code lock with card and proximity tags reader, fingerprints reader and Bluetooth, SUPER SLIM, IP68, 3A relay,

The autonomous code lock combines the function of a digital access control keypad, card and proximity tags reader as well as a fingerprint reader. This modern device works with electromagnetic locks with an access control system. It can also control other electrical or alarm devices. The lock has 1 relay output. Authorized people may enter the room or building after reading the card, entering the access code or scanning the previously saved fingerprint. The non-volatile EPROM memory remembers the stored codes and parameters in the memory in the event of a power failure. Durable and extremely resistant housing to changing weather conditions (IP68). The lock is suitable for surface mounting. It is extremely narrow and can be easily mounted on a fence post. The lit LEDs indicate the operating status of the encoder. Two tags (OR-ZS-890) and two proximity card (OR-ZS-892) included.
