Double knob cylinder IP65 (35+35)

Double knob cylinder suitable for installation in standard doors, it replaces a standard door cylinder opened with a key. It helps to ensure protection against undesired access or opening attempts. Thanks to a smartphone app, the administrator decides who can open the door. One user ID code can be assigned to a number of door cylinders, and it can be deleted and logged off the system, whenever a need occurs. No cables are required for installation. This door cylinder is made of stainless steel. It has a high ingress protection level IP65 and is suitable for outdoor installation.
